CASE STUDY

$20K in Projected Savings: The Power of Integrated Stop Loss Solutions

A TPA representing a 125-life group approached Vālenz Health® for a stop loss quote that would reduce expenses for the plan payer.

With our data-driven underwriting, Valenz designed a policy that would save the organization **$20,000 a year** in premiums by incorporating additional cost-containment solutions, including:

50% Savings	Valenz Precision Care, which delivers an average of **50% savings** against average PPO rates for surgical and imaging procedures.
20% Savings	Valenz Clinical Bill Review, which delivers more than **20% savings** on a first-pass review of post-payment recovery.

Adding on these solutions would cost just $15,000 a year, allowing the organization to implement these extensive cost-containment strategies and **still spend $5,000 less than before** — while reaping the benefits of compounding financial savings over time.

Unlock your savings potential with a custom stop loss quote from the Valenz team today.
